- Security Master Planning
- Policy and Procedure Development
- Security Training
- Chemical Security Services - CFATS

##### Security Engineering

- Security System/Access Control Design
- Vendor Bid Analysis
- Construction Administration
- On-Call Consulting Services

#### Experience:

**Major Metropolitan Hospital** - TSG conducted a vulnerability/risk assessment for the Stem Cell Research Facilities utilizing TSG's 6-Step VA Process. This included a detailed evaluation of the operations, critical assets, threats, and existing countermeasures. Recommendations included an estimated cost, cost-benefit analysis and multi-year implementation plan for enterprise wide physical, electronic and IT security systems.

**Major Metropolitan Hospital** - TSG developed a security master plan for the hospital including multi-year plans for upgrading access control, CCTV and command center systems. The project included preparation of bid documents, evaluation of proposals, construction period services and final system acceptance testing.

**Major Metropolitan Hospital** - TSG developed a policy and procedure philosophy which included an update of emergency response plans; security policies and procedures; and post orders. TSG also developed a training plan and matrix and a periodic update plan to ensure policies and procedures remain up-to-date and accurate.

**Major Hospital Network** - TSG conducted Counter Terrorism, Suicide Bomber Prevention, and Conversational Questioning training for security managers and staff.
